Great Harbor
Great Harbor possible solution from 6’ culvert to 360’ bridge
Railroad Underpass at Long Cove
Water Street at West River
Boston Street at Sluice Creek
Unique features of Rte 146

- State Scenic Road and National Register Historic District designation
- 2000-5000 ADT providing access to many neighborhoods in Branford and Guilford
- State designated bikeway – heavily used by bicyclists
- 4 Amtrak bridge underpasses along the route which flood and have limited clearances
- Narrow ROW with challenging horizontal and vertical alignment
- Various land uses and contexts along the road including historic structures
- Many locations at or below elevation 10’ with most as low as elevations 5’ – 6’
- Significant impacts to coastal resources and character of the road with any improvement projects
- Corridor Study in the works...
